

ENVIRONMENTAL PLANTINGS

RESTORE YOUR LAND AND
EARN LONG-TERM CARBON
INCOME

Environmental Plantings projects can generate Australian Carbon Credit Units (ACCUs) by establishing permanent native forest. Plantings can include mixed-species native vegetation or mallee trees, designed for your property and long-term goals.

Projects restore cleared or degraded areas, leading to healthier land and stronger ecological function. Higher value can be created over time.

Where it Fits

Environmental Plantings may be suitable for:

- Riparian zones
- Shelterbelts
- Eroded or underproductive areas
- Block-scale restoration
- Expanding existing native vegetation

INSIGHT

INNOVATION

LEADERSHIP

Why Consider Environmental Plantings?

- ✓ **New, long-term income** linked to forest growth
- ✓ **Improved biodiversity and wildlife habitat**, supporting native species
- ✓ **Enhanced soil condition**, reduced erosion and better water retention
- ✓ **A practical way** to regenerate marginal or degraded land
- ✓ **Shelter and productivity benefits** for surrounding areas

For managers wanting to improve land condition, strengthen ecological resilience, and invest in long-term restoration.

You choose where plantings fit best — your land, your decision.

HOW IT WORKS

Feasibility Check

We work with you to identify the best planting areas and assess the carbon opportunity.

Project Design

Choose the species mix, planting layout, and management plan to suit your property and long-term vision.

Registration

We prepare and submit the required documentation to the Clean Energy Regulator and guide you through approvals.

Establish Plantings

You implement the native species plan; we support you through establishment and early management.

Monitoring & Reporting

Periodic checks track forest growth, with Climate Friendly ensuring simple, compliant reporting.

Audit → Issuance

Independent auditors verify outcomes; If successful, ACCUs are issued and can be sold or applied to your own goals.

WHY CLIMATE FRIENDLY

- **Proven results:** Around 25% of all land-sector ACCUs in Australia come from projects supported by Climate Friendly.
- **Expertise you can trust:** Deep knowledge in carbon, native vegetation establishment and large-scale restoration.
- **Clear guidance:** We make the process easier, from feasibility through to audit and ACCU issuance.
- **Designed for your operation:** Plantings are tailored to your landscape and long-term objectives.
- **Partnership Opportunities:** Work with conservation groups for added biodiversity benefits.
