

PLANTATION FORESTRY CARBON FARMING

STRENGTHEN YOUR ESTATE & DIVERSIFY YOUR BUSINESS

WHAT DOES THE METHOD ALLOW?

Plantation forestry projects can generate Australian carbon credit units (ACCUs) by planting or maintaining forests that store carbon or avoid emissions.

Implemented alongside an existing forestry operation, a successful ACCU scheme project may:

- Optimise returns with a diversified income stream
- Offset establishment and management costs
- Increase long-term asset value

EXISTING PLANTATIONS

NEW PLANTATION AREAS

FAILED OR UNDERPERFORMING PLANTATIONS

Climate Friendly works with growers and forestry companies to support projects that align with operational plans, regulatory requirements, and commercial objectives.

HOW CARBON FITS YOUR BUSINESS

A project can generate long-term carbon income alongside a plantation operation, designed around:

- your planting and harvesting cycles
- commercial species and market demand
- existing management plans and business requirements.

You maintain full ownership of your property and complete control over management decisions.

HOW IT WORKS

Feasibility & Modelling

We assess your estate, operational plans, and method pathway to estimate carbon potential and value.

Project Design

We work with you to develop a project that fits your plantation plan, harvest schedule, & commercial goals.

Registration

Your project is submitted to the Clean Energy Regulator with a clear management plan and evidence base.

Monitoring & Reporting

We guide data collection and ensure compliance with the method, minimising administrative burden.

Audit → Issuance

We help you through the audit stage – if successful, ACCUs are generated and income begins.

ACCU Sales

Choose a sales strategy that suits your business: spot market, forward contracts, or aggregated sales support.

WHY CLIMATE FRIENDLY

- **Proven delivery.** More than 26 million ACCUs issued to Climate Friendly-supported projects — almost 25% of all land-sector credits in Australia.
- **Expertise.** Our team includes specialists with deep experience in forestry and carbon.
- **Carbon aligned to your forestry goals.** Integrate a carbon project with timber production and restoration objectives.
- **Clear guidance.** We simplify compliance and guide you on each step — from feasibility to issuance.
- **Trusted partner.** Extensive experience across forestry, carbon project delivery, and Australian carbon markets.

Start the conversation

A quick, no-obligation feasibility check will outline your carbon potential and best project pathway.
